

Why Silicone Roof Coatings?

The Ultimate Roof Restoration Coating

Introduction

Fiddler's Roofing, using Progressive Materials' Silicone Roof Coatings, offers a number of roof restoration options that improve the performance and extend the life of your roof.

Silicone roof coatings offer unparalleled waterproofing performance. They are extremely flexible, sustainable, and resistant to oxidation, severe weather, UV rays, and chemicals that can damage your roof. Their cost-effectiveness makes them the economical choice, and their sustainable benefits make them the responsible choice for your roof.

Key Benefits

- Half the cost of a roof replacement
- Leak-free guarantee - up to 20-year warranty
- Resists wash-off during rain extending the installation window
- Environmentally friendly
- Completely seamless membrane
- Will not chalk or degrade from UV exposure

Save Money

By using a PM silicone roof coating, you will pay roughly 50% the cost of a roof replacement. How?

1. No roof tear off - cuts time in half
2. Half the crew size needed for a replacement
3. Half the crew size. Half the time. Half the cost

Easy Installation

Simple three step process:

1. Power wash
2. Prepare joints, flashings, fasteners, etc.
3. Apply coating

Great Warranties

5, 10, 15, & 20 year watertight warranties available

Environmentally Friendly

PM silicone roof coatings help the environment in a multitude of ways:

1. Low VOCs
2. Reflects up to 88% of the sun's UV rays, saving on energy costs and elongating HVAC lifespans
3. Keeps tons of roof tear-off waste out of landfills
4. Can be coated over when necessary

Seamless Membrane

Most leaks begin at the roof's seams. Eliminate the seams and eliminate most of the trouble areas. Simple maintenance will greatly prolong the coating's life.
